Application/Control Number: 10/518,984

Art Unit: 3751

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 16, 2006 has been entered.

Page 2

2. Claims 14-16 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for locking means mounted to both upper and lower portions, does not reasonably provide enablement for locking means mounted to only one portion. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

Applicant did not substantively address this rejection in the response filed June 16, 2006.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 3751

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 14 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Shinn.

The Shinn reference discloses a trap comprising: an upper portion 8; a lower portion 9; a pivotal connection 20; linking means including a hinge 20; a sealing joint 18,19; and locking means including a clip 37 having a locking element 36, a base 17a, and a stud 17b, as claimed. The locking means is considered to meet the function of "snapping" (col. 4 lns. 30-35). The hinge is considered to be "dismantleable".

Applicant argues at page 6 of the response "[t]he present invention carries out a function and achieves results that are neither shown nor suggested by the Shinn patent." The examiner can not agree. All claimed elements, as well as any attendant

Art Unit: 3751

function(s), are met by the Shinn disclosure when that disclosure is reasonably interpreted as discussed supra.

5. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shinn.

The choice of material would appear an obvious choice to be made.

6. This is a continuation of applicant's earlier Application No. 10/518,984. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application.

Accordingly, THIS ACTION IS MADE FINAL even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated

Application/Control Number: 10/518,984 Page 5

Art Unit: 3751

from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication should be directed to Robert M. Fetsuga at telephone number 571/272-4886 who can be most easily reached Monday through Thursday. The Office central fax number is 571/273-8300.
